Languages— English, Korean

Core— Analytical problem-solving, cross-functional communication, prioritization, ownership of execution

Work Experience

United Legwear & Apparel Co., NYC

08/25 – Present

Production Coordinator

- Manage production execution for PUMA Kids and Hurley Men's across Stock and Club business, supporting 150+ seasonal orders and 1,200+ style/color lines across major club, mass, and off-price retail channels from PO through delivery.
- Coordinate with overseas factory partners across Vietnam, Bangladesh, Cambodia, and China, along with sales and internal teams, to resolve production, labeling, artwork, and delivery issues before they impact shipment timelines.
- Secure buyer approvals directly for club accounts, coordinating with factories, PD, sales, vendors, compliance teams, and third-party partners across artwork/layouts, UPC/RFID, FBLs, strike-offs, lab dips, trims, carton markings, hangtags, care labels, and fit/PP/TOP samples prior to production release.
- Monitor production timelines, lead times, and vendor capacity to identify supply risks early and keep orders on track for delivery.
- Build and maintain tracking tools for order status, approvals, vendor invoices, and delivery timelines, removing process bottlenecks and improving order-to-delivery visibility.
- Improve trim production efficiency by introducing printed layout solutions that replace manual sticker application, reducing labor requirements and supporting more cost-efficient execution.

The Moret Group, NYC

10/24 – 07/25

Production Assistant

- Managed production follow-up across four overseas factories for licensed socks/hosiery programs, supporting production timelines, approvals, and shipment execution across off-price and value retail channels.
- Issued and maintained POs/VPOs by gathering internal approvals, confirming due dates with factories, and sending finalized orders to vendors.
- Coordinated daily with Design, Sales, Traffic, and overseas factories on sample approvals, TOP/spec/fit comments, carton markings, packing lists, production timelines, and shipping requirements.
- Conducted cost reviews by comparing reorder prices and FOB cost details against historical data; reviewed vendor invoices, created margin sheets, and coordinated internal approvals prior to issuing VPOs.

Alexander Wang LLC, NYC

06/24 – 07/24

Production & Product Development Intern

- Supported production tracking by maintaining POs, BOMs, product documentation, and production packages in RLM and PLM systems to ensure data accuracy and workflow visibility.
- Assisted with vendor and cross-functional follow-up on sample progress, testing materials, production packages, and development timelines to support organized production execution.

Project

Inventory Risk Analysis & Planning Dashboard | SQL, Tableau, Excel

- Built a SQL/Tableau planning dashboard that surfaces demand, inventory gaps, inbound timing, and replenishment risk in one view, improving visibility into order flow and execution priorities.
