The Fashion Institute of Technology (SUNY), New York, NY AAS in Fashion Business Management, Cum Laude 2021–2023

Summary

Operations and supply chain professional with 2+ years managing high-volume, multi-step workflows across 150+ seasonal orders and 1,200+ product lines from order receipt through delivery. Builds scalable tracking systems, identifies process gaps, and implements cross-functional improvements that strengthen visibility and execution accuracy. Skilled in Excel, SQL, and Tableau, with a demonstrated ability to learn new operational tools and systems quickly.

Skills

Functional— Order management, customer and vendor communication, exception management, order status reporting, ERP data accuracy, delivery risk management, discrepancy resolution, cross-functional coordination

Computer/Technical— Advanced Excel (PivotTables, XLOOKUP, SUMIFS, INDEX/MATCH), PowerPoint, Outlook, Google Sheets, SQL, Tableau, ERP/PLM systems (Exenta, RLM, PLM, AMT)

Core— Analytical problem-solving, prioritization, cross-functional communication, operational execution

Work Experience

United Legwear & Apparel Co., NYC

08/25 – Present

Production Coordinator

- Manage high-volume operational workflows across 150+ seasonal orders and 1,200+ product lines from PO receipt through delivery, monitoring risks, process gaps, and execution issues across each stage.
- Build and maintain centralized tracking tools for order status, approvals, invoices, PO revisions, shortages, and delivery timelines, creating clearer visibility and escalation workflows across teams.
- Identify inefficiencies in manual sticker application, propose printed layout solutions, and coordinate implementation with vendors and internal stakeholders for Spring 2027 production.
- Translate complex retailer and partner requirements into clear operational steps, maintaining accurate visibility across approvals, documentation, production readiness, and delivery milestones.
- Coordinate with overseas manufacturing partners across Vietnam, Bangladesh, Cambodia, and China, along with Sales, Product Development, Compliance, Production Management, and third-party partners to resolve packaging, labeling, production, and delivery issues before they impact shipment timelines.
- Manage multi-step approval workflows across artwork, UPC/RFID, packaging, labeling, carton requirements, and pre-production documentation, catching discrepancies before release and escalating blockers to the appropriate teams.

The Moret Group, NYC

10/24 – 07/25

Production Assistant

- Managed order flow and production follow-up across four overseas manufacturing partners for licensed retail product programs, supporting production timelines, approvals, and shipment execution for accounts including Ross, Five Below, TJX, and Fred Meyer.
- Conducted WIP, cost, and vendor invoice reviews to identify production and delivery discrepancies, improve operational visibility, and support internal approval processes.
- Issued and maintained POs/VPOs by gathering internal approvals, confirming due dates with factories, and sending finalized orders to vendors.
- Coordinated daily with Design, Sales, Traffic, and overseas manufacturing partners on approval status, carton and packing requirements, production timelines, and shipping requirements.

Alexander Wang LLC, NYC

06/24 – 07/24

Production & Product Development Intern

- Supported production and product development tracking by maintaining POs, BOMs, product documentation, and production packages in RLM and PLM systems, ensuring data accuracy and workflow visibility.
- Assisted with vendor and cross-functional follow-up on sample progress, testing materials, production packages, and development timelines to support organized execution across product development and production teams.

Project

Inventory Risk Analysis & Planning Dashboard | SQL, Tableau, Excel

- Built a self-directed SQL/Tableau dashboard to surface demand, inventory gaps, inbound timing, WOS, and replenishment risk in one view, improving visibility into order flow and execution priorities.
- Used Excel and SQL to organize operational data, identify stockout risk and excess inventory, and translate findings into replenishment and planning recommendations.
