The Fashion Institute of Technology (SUNY), New York, NY - AAS in Fashion Business Management, Cum Laude 2021–2023

Summary

Supply chain operations professional with 2+ years managing high-volume order execution, shipment coordination, and delivery risk from PO through delivery. Experienced tracking order flow, inventory-related risks, and shipment readiness while coordinating across suppliers and internal teams to resolve operational issues.

Skills

Functional— Order lifecycle management, Shipment coordination, Order fulfillment tracking, Inventory visibility, Supply-risk management, Delivery execution, Operational reporting, Cross-functional issue resolution

Computer/Technical— Advanced Excel (PivotTables, XLOOKUP, SUMIFS, INDEX/MATCH), Power BI, SQL, Tableau, ERP/PLM systems (Exenta, RLM, PLM, AMT), Microsoft Office, Google Sheets

Core— Analytical problem-solving, prioritization, cross-functional communication, execution ownership

Work Experience

United Legwear & Apparel Co., NYC

08/2025 – Present

Production Coordinator

- Manage high-volume order and supplier execution for PUMA Kids and Hurley Men's across 150+ seasonal orders and 1,200+ style/color lines from PO receipt through delivery, tracking order status, shipment readiness, retailer requirements, and supply risks.
- Serve as a day-to-day point of contact for factory partners across Vietnam, Bangladesh, Cambodia, and China, coordinating with Sales and internal teams to resolve production, labeling, artwork, and delivery issues before they affect shipment timelines.
- Monitor production milestones, lead times, and vendor readiness to identify critical-path risks early and escalate issues before they affect delivery.
- Coordinate revised delivery dates with overseas factories, communicate timing impacts and updated timelines to Sales and cross-functional teams, and maintain visibility into at-risk orders.
- Build and maintain tracking tools for order status, approvals, vendor invoices, and delivery timelines, removing process bottlenecks and improving order-to-delivery visibility.
- Coordinate sample and production approvals across artwork, lab dips, strike-offs, trims, care labels, packaging, and fit/PP/TOP samples, partnering with factories and cross-functional teams to maintain calendar deadlines and support on-time production release.
- Improve trim production efficiency by introducing printed layout solutions that replace manual sticker application; solution adopted for Spring 2027 production to reduce manual labor and improve cost efficiency.

The Moret Group, NYC

10/2024 – 07/2025

Production Assistant

- Issued and maintained POs/VPOs by gathering internal approvals, confirming due dates with factories, and sending finalized orders to vendors.
- Managed production follow-up across four overseas factories for licensed socks and hosiery programs, tracking production timelines, approvals, shipment requirements, and delivery execution for major retail accounts.
- Coordinated daily with Design, Sales, Traffic, and overseas factories on sample approvals, carton markings, packing lists, production timelines, and shipping requirements.
- Reviewed vendor pricing against prior-season costs and product trim requirements, negotiated pricing adjustments with overseas factories, and verified accurate costs before issuing VPOs.

Alexander Wang LLC, NYC

06/2024 – 07/2024

Production & Product Development Intern

- Supported production and product development tracking by maintaining POs, BOMs, product documentation, and production packages in RLM and PLM systems, ensuring data accuracy and workflow visibility.
- Assisted with vendor and cross-functional follow-up on sample progress, testing materials, production packages, and development timelines to support organized execution across product development and production teams.

Project

Inventory Risk Analysis & Planning Dashboard | SQL, Tableau, Excel

- Built a self-directed SQL/Tableau dashboard to analyze demand, inventory gaps, inbound timing, WOS, and replenishment risk, highlighting supply risks and execution priorities across product categories.
