The Fashion Institute of Technology (SUNY), New York, NY - AAS in Fashion Business Management, Cum Laude 2021–2023

Summary

Production professional with 2+ years managing seasonal production execution end-to-end across multi-vendor licensed portfolios, including PUMA and Hurley. Manages 150+ orders from PO through delivery, coordinating vendors, timelines, approvals, packaging/labeling, and shipment execution. Builds tracking tools, identifies production risks early, and drives process improvements that remove bottlenecks and improve order-to-delivery flow.

Skills

Functional— Production execution & order lifecycle management, WIP tracking, Vendor & third-party partner management, Production timeline & lead-time management, Sample approval coordination, Packaging & labeling coordination, Supply risk identification & resolution, Process improvement, Cross-functional coordination

Computer/Technical— Advanced Excel (PivotTables, XLOOKUP, SUMIFS, INDEX/MATCH, Power Query), SQL, Tableau, Power BI, Shopify, ERP systems (Exenta, RLM, PLM, AMT), Google Sheets

Core— Analytical problem-solving, cross-functional communication, prioritization, ownership of execution

Work Experience

United Legwear & Apparel Co., NYC

08/25 – Present

Production Coordinator

- Manage 150+ seasonal orders for PUMA Kids and Hurley Men's across major club, mass, and off-price retail accounts, including Costco, Sam's Club, BJ's, Kohl's, TJX/Marmaxx, and Ross, tracking WIP status, approvals, packaging/labeling requirements, inventory availability, and shipment timing from PO creation through delivery.
- Coordinate with overseas vendors, sales, and internal teams to resolve production, labeling, artwork, and delivery issues before they impact shipment timelines.
- Monitor production timelines, lead times, and vendor capacity to identify supply risks early and keep orders on track for delivery.
- Build and roll out tracking tools for order status, approvals, and delivery timelines, removing process bottlenecks and improving order-to-delivery flow.
- Identify trim production inefficiencies and propose transitioning from manual sticker application to printed layouts, improving efficiency and reducing labor requirements.
- Standardize RFID labeling and artwork processes with vendors and third-party partner Avery Dennison, improving execution accuracy across seasonal production.

The Moret Group, NYC

10/24 – 07/25

Production Assistant

- Managed end-to-end order flow, production timelines, and delivery schedules across overseas factories, flagging risks to shipment execution and inventory availability.
- Tracked sample approvals, production milestones, and delivery updates to keep shipments aligned with production schedules.
- Resolved vendor discrepancies, including labeling and product data issues, preventing shipment delays and improving delivery accuracy.
- Performed WIP and cost analysis to surface production and delivery discrepancies, improving operational visibility.

Alexander Wang LLC, NYC

06/24 – 07/24

Production & Product Development Intern

- Supported production tracking by maintaining POs, BOMs, and documentation in RLM and PLM systems to ensure data accuracy and workflow visibility.
- Assisted in coordinating with vendors and cross-functional teams on sample progress, testing materials, and production packages to keep development timelines aligned.

Project

Inventory Risk Analysis & Planning Dashboard | SQL, Tableau, Excel

- Analyzed demand, inventory, inbound timing, and replenishment gaps using SQL and Excel; identified Q4 demand surge of 1,200+ units and stockout risks in skincare and makeup to support replenishment planning.
- Built an interactive Tableau dashboard to visualize inventory risk, forecast gaps, WOS, and planning priorities by product category, improving visibility into SKU-level replenishment needs.
- Applied core inventory planning concepts, including 20% safety stock buffer and 300-unit reorder points; proposed targeted promotions to reduce excess apparel inventory and support sell-through strategy.
