The Fashion Institute of Technology (SUNY), New York, NY - AAS in Fashion Business Management, Cum Laude 2021–2023

Summary

Supply chain professional with 2+ years of experience supporting order flow, vendor timelines, inventory visibility, and production data for licensed retail brands including PUMA and Hurley. Skilled in Excel, ERP systems, and Tableau-based analytics to support inventory planning, supply alignment, and risk visibility.

Skills

Functional— Demand planning & forecasting support, Inventory planning support, Data analysis for supply chain decision-making, Vendor performance analysis, Order flow analysis, PO lifecycle management, Risk identification & mitigation, Supply chain coordination

Computer/Technical— Advanced Excel (PivotTables, XLOOKUP, SUMIFS, INDEX/MATCH, Power Query), SQL, Tableau, Power BI, ERP systems (Exenta, RLM, PLM, AMT), Google Sheets

Core— Analytical problem-solving, cross-functional communication, prioritization

Work Experience

United Legwear & Apparel Co., NYC

08/25 – Present

Production Coordinator

- Analyze order flow, inventory impact, and sales implications to identify risks impacting product availability and support planning decisions.
- Assess production timelines, lead times, and vendor capacity to identify supply constraints and proactively address potential disruptions.
- Analyze 150+ seasonal orders to monitor order status, inventory availability, shipment timing, and potential supply risks, supporting inventory planning and replenishment visibility.
- Develop and implement tracking tools to monitor order status, approvals, and delivery timelines, identifying and eliminating process bottlenecks to improve inventory flow and support planning decisions.
- Identify inefficiencies in trim production processes and propose transitioning from manual sticker application to printed layouts, improving efficiency and reducing labor requirements.
- Partner with vendors and third-party partners (Avery Dennison) to standardize RFID labeling and artwork processes, improving execution accuracy across seasonal production.

The Moret Group, NYC

10/24 – 07/25

Production Assistant

- Analyzed end-to-end order flow, production timelines, and delivery schedules across overseas factories to identify risks impacting shipment execution and inventory availability.
- Managed order flow, sample approvals, and milestone tracking to ensure on-time delivery and alignment with shipment timelines.
- Identified and resolved vendor discrepancies, including labeling and product data issues, preventing shipment delays and improving delivery accuracy.
- Performed WIP and cost analysis to identify production and delivery discrepancies, improving visibility into operational performance and supporting data-driven supply chain decisions.

Alexander Wang LLC, NYC

06/24 – 07/24

Production & Product Development Intern

- Supported production and product development tracking by managing POs, BOMs, and documentation within RLM and PLM systems to ensure data accuracy and workflow visibility.
- Coordinated with vendors and cross-functional teams to monitor sample progress, testing materials, and production packages, contributing to organized development timelines and execution alignment.

Joomi Lim LLC, NYC

01/23 – 06/23

Production & Marketing Intern

- Supported production coordination through PO tracking and sample management across seasonal timelines.

Kara Interior, Republic of Korea

12/21 – 08/22

Product Development Intern

- Supported QC, PO tracking, and production reporting to ensure data accuracy and alignment with production plans.

Project

Inventory Risk Analysis & Planning Dashboard | SQL, Tableau, Excel, HTML/CSS

- Analyzed demand, inventory, inbound timing, and replenishment gaps using SQL and Excel to identify stockout risks.
- Built Tableau dashboard to visualize inventory risk, forecast gaps, and planning priorities across product categories.
- Created a custom web portfolio to present supply chain analytics projects and business recommendations.
